A0685-2.1

ENGINEERING AND TECHNOLOGY ENROLLMENTS FALL 1983

PART I

Engineering Enrollments by School and by Curriculum
For All Students Including a Breakdown by Women,
Minorities and Foreign Nationals

A Report of an Annual Survey
Conducted by the

ENGINEERING MANPOWER COMMISSION

A Commission of the Engineering Affairs Council
of the
American Association of Engineering Societies, Inc.
345 East 47th Street
New York, New York 10017

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The American Association of Engineering Societies (AAES) is a national federation of organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

1984 OFFICERS

Nicholas J. Radell
Chairman

James Y. Oldshue
Chairman-Elect

John A. White
Secretary/Treasurer

Robert M. Saunders
Past-Chairman

Daniel V. DeSimone
Executive Director

ENGINEERING AFFAIRS COUNCIL

The Engineering Affairs Council is responsible for matters concerned with the practice of engineering in the public interest. The Council encourages voluntary exchanges of information, coordination of goals and joint action.

1984 OFFICERS

Chairman

Edward J. Doyle
Vice-Chairman

Patrick J. Sheridan
Secretary/Treasurer

THE ENGINEERING MANPOWER COMMISSION
of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower issues.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> "To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."

ENGINEERING MANPOWER COMMISSION

Manpower Statistician

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is grateful for the cooperation of the hundreds of deans and college officials who provided the data on which this report is based. This survey was conducted by the EMC staff in consultation with Dr. Francis W. Stacey, Chairman of the Enrollment Survey.

- Asian/Pacific Islanders 257
- American Indians 305
- Foreign Nationals 353

Combined Summary 401

INTRODUCTION

Since 1967, the Engineering Manpower Commission has conducted annual studies of engineering and technology enrollments in order to provide timely and accurate education data. This publication is the sixteenth in that series and reflects enrollments as of the fall of 1983.

This report is divided into two parts and presents data for all students enrolled in engineering and engineering technology programs by curriculum and school. Summaries of student enrollment in ABET-accredited programs are shown. Undergraduate students are reported by year and graduate students by degree level. Data is presented for all students combined, as well as for women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It should be noted that Part I deals exclusively with engineering enrollments and Part II with engineering technology enrollments.

Part I contains detailed *engineering* enrollment data by school for all students, women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It also contains detailed data by curriculum for all the above mentioned groups, as well as summary curriculum data, combined for all schools.

Part II contains detailed engineering *technology* enrollment data by school for all students, women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It also contains detailed data by curriculum for each of the above groups of students, as well as summary curriculum data, combined for all schools.

Although every attempt has been made to eliminate errors in reporting the statistics, some discrepancies may appear. In several cases, inconsistencies in the data submitted have been corrected, or related curricula grouped under a common title so that this report would be manageable in size. Any questions regarding the course content of a specified program should be directed to the reporting institution. Users of this report are advised to read the explanatory material before using the data tables provided herein.

For the convenience of users, these parts of Engineering and Technology Enrollments — Fall 1983 are available separately or as a set. Orders may be placed with the Publications Department, American Association of Engineering Societies, 345 East 47th Street, New York, New York 10017.

THE 1983 ENGINEERING ENROLLMENT SURVEY

In September of 1983, questionnaires were sent to 292 U.S. schools offering engineering programs at least at the bachelor's degree level.

ESTIMATED DATA

Information was not received from the following engineering schools at the time of publication. In order to present reasonably comparative data to previous reports, information from the 1982 report has been substituted for these institutions:

Humboldt State
West Coast University
University of Evansville
Tulane University
U.S. Naval Academy
University of Lowell
Western New England College
Polytechnic Institute of N.Y.
Union College
University of Nevada (graduate programs only)
Grove City College
Lehigh University
Villanova University
University of Puerto Rico (graduate programs only)
University of Utah School of Mines
Seattle Pacific University
West Virginia Institute of Technology

Previous year's data is indicated in this report by an asterisk(*) appearing before the substituted entry.

The following engineering schools have not provided us with data recent enough to be of accurate use in this publication. We regret that we are unable to include their data in this year's publication:

San Francisco State University
Northeastern Oklahoma State

These engineering schools are listed in the report with "XX" following the school name to indicate where their data would have appeared. An estimate of the combined data for these schools appears at the end of each section of the report under the heading of "XX All Unreported".

DATA TABLES

It should be noted that the following features are common to all tables:

(a) The figures for the individual undergraduate years are for FULL-TIME students only. All part-time enrollments are combined regardless of the student's academic standing.

(b) Full-time advanced degree enrollments are reported under the headings of master's, engineer, or doctorate degrees, and as a total for all full-time graduate students. All part-time graduate student enrollments are combined in one column.

Accreditation and Control Identification (AC). Schools have been assigned a two-digit code to indicate accreditation and public or private control.

The first digit (1-6) indicates accreditation as follows:

1 = At least one engineering curriculum accredited by ABET (1981) list). Used only in the engineering tables.
2 = At least one technology curriculum accredited by ABET (1981 list). Used only in technology tables.
4 = Accredited by regional accrediting commission (1981-1982 list).
5 = Accredited by National Association of Trade and Technical Schools (NATTS, 1981-82 list).
6 = None of the above.

The second digit (1-5) indicates control as follows:

1 = Public - state or local government control
2 = Public - federal government control
3 = Private - non-profit, non-sectarian
4 — Private - religious
5 = Private - proprietary

For the purposes of recording accreditation status, information was obtained from the Accreditation Board for Engineering & Technology (ABET) 1981 report. ABET-accreditation status for bachelor's and master's degree programs is shown in the column designated "AC" where curricula are listed individually.

HISTORICAL SUMMARY
ENGINEERING ENROLLMENTS IN FALL, 1983
As Compared With Earlier Years

	Fall 1973	Fall 1974	Fall 1975	Fall 1976	Fall 1977	Fall 1978	Fall 1979	Fall 1980	Fall 1981	Fall 1982	Fall 1983

As it is the objective of AAES, Inc. publications to be a forum for the free expression and interchange of ideas, the opinions, positions, and research stated in published works are those of the original researchers and authors and not by the fact of publication neccessarily those of the American Association of Engineering Societies, Inc., or related bodies. Contributing researchers and authors are requested and expected to disclose any financial, economic, or professional interests or affiliations that may have influenced positions taken or advocated in these materials.

ISBN 0-87615-084-9

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The American Association of Engineering Societies (AAES) is a national federation of organizations representing nearly one million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

1984 OFFICERS

Nicholas J. Radeli
Chairman

James Y. Oldshue
Chairman-Elect

John A. White
Secretary/Treasurer

Robert M. Saunders
Past-Chairman

Daniel V. DeSimone
Executive Director

ENGINEERING AFFAIRS COUNCIL

The Engineering Affairs Council is responsible for matters concerned with the practice of engineering in the public interest. The Council encourages voluntary exchanges of information, coordination of goals and joint action.

1984 OFFICERS

William E. Carew
Chairman

Edward J. Doyle
Vice-Chairman

Patrick J. Sheridan
Secretary/Treasurer

THE ENGINEERING MANPOWER COMMISSION
of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower issues.

The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> "To engage in studies and analysis of the supply, demand, and utilization of engineering and techinical manpower; to make recommendation, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is grateful for the cooperation of the hundreds of deans and college officials who provided data on which this report is based. This survey was conducted by Deborah C. Seiler under the direction of Carolyn J. Heydt, Manager of the EMC staff. Dr. Francis W. Stacey is Chairman of the Enrollment Survey.

INTRODUCTION

Since 1967, the Engineering Manpower Commission has conducted annual studies of engineering and technology enrollments in order to provide timely and accurate education data. This publication is the seventeenth in that series and reflects enrollments as of the fall of 1983.

This report is divided into two parts and presents data for all students enrolled in engineering and engineering technology programs by curriculum and school. Summaries of student enrollment in ABET-accredited programs are shown. Undergraduate students are reported by year and graduate students by degree level. Data is presented for all students combined, as well as for women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It should be noted that Part I deals exclusively with engineering enrollments and Part II with engineering technology enrollments.

Part I contains detailed *engineering* enrollment data by school for all students, women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It also contains detailed data by curriculum for all the above mentioned groups, as well as summary curriculum data, combined for all schools.

Part II contains detailed engineering *technology* enrollment data by school for all students, women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It also contains detailed data by curriculum for each of the above groups of students, as well as summary curriculum data, combined for all schools.

Although every attempt has been made to eliminate errors in reporting the statistics, some discrepancies may appear. In several cases, inconsistencies in the data submitted have been corrected, or related curricula grouped under a common title so that this report would be manageable in size. Any questions regarding the course content of a specified program should be directed to the reporting institution. Users of this report are advised to read the explanatory material before using the data tables provided herein.

For the convenience of users, these parts of Engineering and Technology Enrollments — Fall 1983 are available separately or as a set. Orders may be placed with the Publications Department, American Association of Engineering Societies, 345 East 47th Street, New York, New York 10017.

THE 1983 ENGINEERING TECHNOLOGY ENROLLMENT SURVEY

This report contains data received from technical institutions on their enrollments of fall 1983. While the statistics reported represent the majority of students in two-year and four-year engineering technology programs, *they are not the total engineering technology enrollments in the United States*. Some schools surveyed did not reply to the survey questionnaire and are not included in the report.

This year's engineering technology enrollments report contains data on engineering technology programs only. As of September, 1982 the Engineering Manpower Commission has discontinued monitoring industrial technology programs.

Information was not received from the following ABET-accredited engineering technology schools at the time of publication. Information from the 1982 report has been substituted for these institutions:

Devry Phoenix
Glendale Community College
Cogswell College
Colorado Technical College
Purdue University, Calumet
Prince George's Community College
University of Lowell
Longview Community College
New Hampshire Technical Institute
Hudson Valley Community College
Technical Career Institutes
Forsyth Technical Institute
Guilford Technical Institute
Sandhills Community College
Franklin University
Owens Tech College
Sinclair Community College
Stark Technical College
Blue Mountain Community College
Roger Williams College
Florence Darlington Technical College
Knoxville State Technical College
Roane State Community College
Milwaukee School of Engineering

Previous year's data is indicated in this report by an asterisk(*) appearing before the substituted entry.

The following ABET-accredited engineering technology schools have not provided us with data recent enough to be of accurate use in this publication. We regret that we are unable to include their data in this year's publication:

City College of San Francisco
Northrop University
Samuel I Ward - University of Hartford
Florida A & M University
Delta College
Atlantic Community College
Kent State University
Sumter Area Technical College
University of Houston-Downtown College
Institute of Textile Technology

DATA TABLES

The following data tables are presented for students enrolled in engineering technology programs:

(1) Enrollments for all curricula combined for each school arranged by class and degree level for associate, pre-engineering and bachelor programs. Detailed data for all students combined, women, Black, Hispanic, American Indian, and Asian/Pacific students are reported.

(2) Enrollments for each curriculum by school arranged by class or degree level for associate, pre-engineering and bachelor programs. Detailed data and summaries for women, Black, Hispanic, American Indian, and Asian/Pacific students are reported together with additional summary data for these special populations combined.

It should be noted that all part-time students at the associate or pre-engineering levels are reported together, and all part-time bachelor degree students are reported as totals without regard to class year.

Pre-engineering (the first two years of a four-year program) is listed as a separate curriculum without breakdown of technical speciality. This is because previous surveys have indicated that most of these programs are general in nature, although many students are undoubtedly oriented toward a particular technical field. Most associate degree programs are designed to be terminal in nature, but many graduates continue on to a higher degree. Similarly, many students who complete the first two years of engineering transfer programs never enroll in engineering schools.

Accreditation and Control Identification (AC). Schools have been assigned a two-digit code to indicate accreditation and public or private control.

The first digit (1-6) indicates accreditation as follows:

1 = At least one engineering curriculum accredited by ABET (1982 list). Used only in the engineering tables.
2 = At least one engineering technology curriculum accredited by ABET (1982 list). Used only in the engineering technology tables.
4 = Accredited by regional accrediting commission (1981-82 list).
5 = Accredited by National Association of Trade & Technical Schools (NATTS, 1981-82 list).
6 = None of the above.

The second digit (1-5) indicates control as follows:

1 = Public - state or local government control
2 = Public - federal government control
3 = Private - non-profit, non-sectarian
4 = Private - religious
5 = Private - Proprietary

For the purposes of recording accreditation status, information was obtained from the Accreditation Board of Engineering & Technology (ABET) 1982 report. "A" denotes associate degree, and "B" refers to bachelor's.

ENGINEERING TECHNOLOGY CURRICULA

Data have been consolidated into 22 curricula groups as shown here:

Aeronautical
Agricultural
Air Conditioning
Architectural
Automotive
Chemical
Civil
Computer
Construction
Drafting & Design
Electrical
Electromechanical
Electronic
Engineering Science
General
Industrial
Marine
Materials
Mechanical
Mining, Metall., Petrol.
Nuclear
Other

Although titles may be the same, the combinations are *not* the same as for engineering enrollments. The curriculum title used by individual schools may differ from the group heading. The title as reported is shown in the detailed reports for each curriculum group.

HISTORICAL SUMMARY
ENGINEERING TECHNOLOGY PROGRAMS ACCREDITED BY ABET[1]

Engineering Technology Students	Fall 1973	Fall 1974	Fall 1975	Fall 1976	Fall 1977	Fall 1978	Fall 1979	Fall 1980	Fall 1981	Fall 1982	Fall 1983
First Year, Full-Time*	22,412	23,348	27,315	28,384	31,558	30,757	18,102	22,127	21,483	14,123	23,995
Second Year, Full-Time*	13,546	13,232	15,945	18,235	19,566	18,254	10,985	13,302	14,434	11,505	16,828
Other Full-Time Associate Degree Students	491	1,029	811	896	928	515	455	784	541	221	709
Bachelor of Engineering Technology Students, Third and Later Years, Full-Time	6,526	6,868	9,121	10,487	12,490	13,063	8,805	11,542	12,389	11,349	18,719
TOTAL FULL-TIME STUDENTS	42,975	44,477	53,192	58,002	64,542	62,589	38,347	47,755	48,847	37,198	60,096
TOTAL PART-TIME STUDENTS	12,506	14,180	21,476	19,429	14,079	16,949	15,271	17,395	16,639	13,442	24,134
Number of Schools **	91	96	112	119	135	133	150	166	161	154	161

[1] Data up to and including 1978 represent all enrollments in schools with at least one engineering technology curriculum accredited by the Accreditation Board for Engineering and Technology at the time of the survey. Data for 1979, which first used the new format, identify enrollments in engineering technology *programs* accredited by ABET.

* Includes students in both associate and bachelors' degree programs for these years.

** Schools with at least one curriculum accredited by ABET. The Pennsylvania State University Commonwealth Campuses are counted as one institution.

NOTE: All of the above statistics should be considered approximate because of factors explained in the text.

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The American Association of Engineering Societies (AAES) is a national federation of organizations representing one-half million engineers.

As a central coordinating organization, AAES focuses the resources of the engineering societies on technological issues of national and international importance.

1985 OFFICERS

James Y. Oldshue
Chairman

John A. White
Chairman-Elect

L. Manning Muntzing
Secretary/Treasurer

Nicholas J. Radell
Past-Chairman

Daniel V. DeSimone
Executive Director

ENGINEERING AFFAIRS COUNCIL

The Engineering Affairs Council is responsible for matters concerned with the practice of engineering in the public interest. The Council encourages voluntary exchanges of information, coordination of goals and joint action.

1985 OFFICERS

William E. Carew
Chairman

Edward J. Doyle
Vice-Chairman

THE ENGINEERING MANPOWER COMMISSION
of the
AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES, INC.

The Engineering Manpower Commission was organized in 1950 to serve as a focus for national technological manpower issues. The Commission's program is carried out through the collection, analysis, and publication of significant data on engineering manpower, as well as the development of programs and policies designed to acquaint the public with the importance of engineering to the national welfare.

The Engineering Manpower Commission is charged with the following responsibility:

> "To engage in studies and analyses of the supply, demand, and utilization of engineering and technical manpower; to make recommendations, conduct programs, and develop reports concerning these aspects of engineering and technical manpower; and to carry on such other programs in the field of manpower as may be authorized by the Engineering Affairs Council of AAES."

ENGINEERING MANPOWER COMMISSION
1985 OFFICERS

Donald G. Schroeter
Chairman

Paul B. Wood
Vice-Chairman

Eugene T. Daniel
Vice-Chairman

E.T. Kirkpatrick
Chairman, Education Committee

Paul Doigan
Chairman, Enrollment Survey

MANPOWER ACTIVITIES

R.A. Ellis
Manager, Manpower Studies

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is grateful for the cooperation of the hundreds of deans and college officials who provided the data on which this report is based.

Combined Summaries 295

INTRODUCTION

Since 1967, the Engineering Manpower Commission has conducted annual studies of engineering and technology enrollments in order to provide timely and accurate education data. This publication is the seventeenth in that series and reflects enrollments as of the fall of 1984.

This report is divided into two parts and presents data for all students enrolled in engineering and engineering technology programs by curriculum and school. Summaries of student enrollment in ABET-accredited programs are shown. Undergraduate students are reported by year and graduate students by degree level. Data is presented for all students combined, as well as for women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It should be noted that Part I deals exclusively with engineering enrollments and Part II with engineering technology enrollments.

Part I contains detailed *engineering* enrollment data by school for all students, women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It also contains detailed data by curriculum for all the above mentioned groups, as well as summary curriculum data, combined for all schools.

Part II contains detailed engineering *technology* enrollment data by school for all students, women, Blacks, Hispanics, American Indians, Asian/Pacific Islanders, and foreign national students. It also contains detailed data by curriculum for each of the above groups of students, as well as summary curriculum data, combined for all schools.

Although every attempt has been made to eliminate errors in reporting the statistics, some discrepancies may appear. In several cases, inconsistencies in the data submitted have been corrected, or related curricula grouped under a common title so that this report would be manageable in size. Any questions regarding the course content of a specified program should be directed to the reporting institution. Users of this report are advised to read the explanatory material before using the data tables provided herein.

For the convenience of users, these parts of Engineering and Technology Enrollments – Fall 1984 are available separately or as a set. Orders may be placed with the Publications Department, American Association of Engineering Societies, 415 Second Street NE, Suite 200, Washington DC 20002.

THE 1984 ENGINEERING ENROLLMENT SURVEY

In September of 1984 questionnaires were sent to 289 U.S. schools offering engineering programs at least at the bachelor's degree level.

ESTIMATED DATA

Information was not received from the following engineering schools at the time of publication. In order to present reasonably comparative data to previous reports, information from the 1983 report has been substituted for these institutions:

University of Alabama, Huntsville
Arkansas Tech University
California State Polytechnic
Fairleigh Dickinson University
University of Hartford
Harvard University
University of Idaho
Idaho State University
Illinois Institute of Technology
University of Michigan, Dearborn
New Jersey Institute of Technology
University of New Orleans
Northern Arizona University
Northrop University
Oakland University
Prairie View A & M College
University of Puerto Rico
St. Mary's University
Syracuse University
Texas Tech University
The Citadel
U.S. Coast Guard Academy
U.S. Naval Postgraduate School
Walla Walla College
University of Wyoming

Estimated & previous year's data is indicated in this report by an asterisk(*) appearing before the estimated or substituted entry.

The following engineering schools have not provided us with data recent enough to be of accurate use in this publication. We regret that we are unable to include their data in this year's publication:

Polytechnic Institute of NY
Seattle Pacific University

DATA TABLES

It should be noted that the following features are common to all tables:

(a) The figures for the individual undergraduate years are for FULL-TIME students only. All part-time enrollments are combined regardless of the student's academic standing.

(b) Full-time advanced degree enrollments are reported under the headings of master's, engineer, or doctorate degrees, and as a total for all full-time graduate students. All part-time graduate student enrollments are combined in one column.

Accreditation and Control Identification (AC). Schools have been assigned a two-digit code to indicate accreditation and public or private control.

The first digit (1-6) indicates accreditation as follows:

1 = At least one engineering curriculum accredited by ABET (1984 list). Used only in the engineering tables.
2 = At least one technology curriculum accredited by ABET (1984 list). Used only in technology tables.
4 = Accredited by regional accrediting commission.
5 = Accredited by National Association of Trade and Technical Schools.
6 = None of the above.

The second digit (1-5) indicates control as follows:

1 = Public - state or local government control
2 = Public - federal government control
3 = Private - non-profit, non-sectarian
4 — Private - religious
5 = Private - proprietary

For the purposes of recording accreditation status, information was obtained from the Accreditation Board for Engineering & Technology (ABET) 1984 report. ABET-accreditation status for bachelor's and master's degree programs is shown in the column designated "ACCR" where curricula are listed individually.

N = Non-accredited
B = Accredited at the Bachelor's level
M = Accredited at the master's level

HISTORICAL SUMMARY
ENGINEERING ENROLLMENTS IN FALL, 1984
As Compared With Earlier Years
